

How to use the 3D viewer

Computer, iPad and phone. You can't break anything. Refresh the page to start over.

- 1 ? How to use 2 Hide panel 3 Colors / B&W chip 4 Hint bar 5 Show hidden

Seeing inside

- **Auto-hide near wall:** zoom in close and walls in your way fade out.
- Right-click / press and hold a part: **Hide this**, **Hide all of this type**, **Show all hidden**.
- **Show hidden** at the top of the panel brings everything back.

Layers (side panel)

- Tick or untick a group (Roof, Structure...). Tap ► to see what's inside.
- **All on / All off / Defaults** (back to the start).
- **Foundation:** concrete foundation only. **Exterior concrete:** slabs outside the building.

Colors and finishes

- **Colors / Finishes:** real colors + the color picker in the side panel.
- **B&W:** plain model, easier to read shapes.
- Tap a part (Roof, Siding...) in the panel, then a swatch. **Defaults** restores the chosen colors.
- **Rooms** (some projects): tap a room to go inside and try paint.

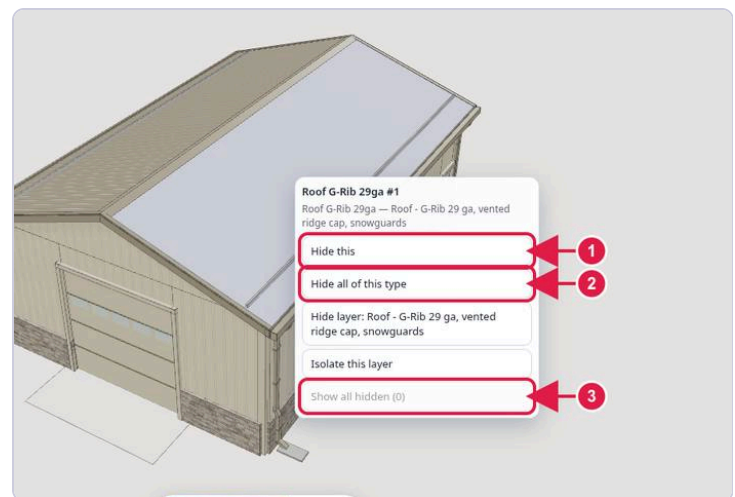

On iPad / phone

- **? How to use** is at the top right. Tap ✕ on the first-visit tip to hide it for good.
- **Hide panel** gives the model the full screen. Turn the iPad sideways for the most room.

Getting around

	Mouse	Touch
Turn	Drag	1-finger drag
Slide (pan)	Right-drag	2-finger drag
Zoom	Scroll wheel	Pinch
Part info	Click a part	Tap a part
Hide menu	Right-click a part	Press and hold

Reset view (side panel) puts the camera back. **Views** buttons jump to interior, exterior, top view and more.

Troubleshooting

- **Slow loading:** the model is large. Wait up to a minute on Wi-Fi; close other tabs.
- **Blank screen:** refresh. Use current Safari, Chrome or Edge. On iPad, close other apps.
- **Lost the view:** **Reset view**; **Defaults** for layers.
- **Refresh:** F5 / Ctrl+R (Mac ⌘+R), or the ↺ arrow on iPad/phone.
